10. C. Erb and C. R. Harvey, "The Golden Dilemma," *Financial Analysts Journal,* 69, no. 4 (2013): 10–42, shows that gold is an unreliable inflation hedge over short- and medium-term horizons.
11. Similar to gold, Bitcoin is likely too volatile to be a reliable inflation hedge over short horizons. While theoretically decoupled from any country's money supply or economy, in the brief history of Bitcoin we have not experienced any inflation surge. Therefore, there is no empirical evidence of its efficacy.

2. Fungible tokens have equal value just as every dollar bill has equal value and a $10 dollar bill is equal to two $5 dollar bills. Non-fungible tokens, in contrast, reflect the value of what they are associated with (e.g., one non-fungible token may be associated with a piece of art like a painting). They do not necessarily have equal value.
