AUTOMATING THE CASH-FLOW

When Ned Stark died on 'Game of Thrones' in 2011, it turned a cult following into a world sensation. After that, several TV characters started dying. As a statistic, 409 characters were culled on TV in 2015. Numbness set in after a few deaths and now a character's demise is like a ritual passage to keep a show alive. Likewise, when personal finance writers advise to cut down spending and keep budgeting, it feels like an eye opener at the beginning. After reading about the same advice several times, we become numb and indifferent to it.

If you've ever thought to yourself:

- ➔ *I never know if I'm spending too much*
- ➔ *I think money is important but I can never get around to it*
- ➔ *All this money stuff bores me, so I ignore it*

I know, I know. I feel like this every-day too.

I don't know a sane person who woke up one morning and said, *"Today I want to learn about balancing my portfolio by learning how gold works. Oh maybe, I shouldn't forget to add fixed income instruments into the learning module!"*

Wrong, wrong, so very wrong. *Who ever invented capitalism?!*

Let's not kid ourselves. We hate spending time to figure out how to cut down spending money. If there is one wish god granted, it'd be to send someone who'd manage money for me. But then it turned out, automation is like a god-send for us with minimal attention habits. I'll tell you why:
