3. Be flexible, change courses quickly.

4. Be steadfast, keep a steady course, have faith in your ideas.

5. Never sell too soon.

6. It's never too soon to sell.

7. Let your profits run.

8. Cut your losses, and take profits as soon as you can.

9. Invest for the long term, the short term is unpredictable.

10. Invest for the short term, the long term is unpredictable. "Short term trading is the safest form of speculation that exists" says Mr. Loeb. "In the long term we'll all be dead," says Mr. Keynes. That's John Maynard Keynes, famous economist and short-term speculator, who in the long term has proven his point.

11. Never risk what you can't afford to lose.

12. A big risk is the key to a big gain. Play for meaningful stakes.

13. Buy when the experts are optimistic.

14. "Sell when the experts are optimistic." This latter from Benjamin Graham, author of *The Intelligent Investor*.

15. Buy when prices are low and there's nowhere to go but up.

16. Buy when prices are high; things will continue to go up.

17. Set specific investment goals.

18. Don't limit yourself to artificial yardsticks.

19. Study as much as you can; the ignorant investor is a sure loser.

20. Study nothing, since a little knowledge is a dangerous thing. "If you merely try to bring a little extra knowl-
