Don't get enamored with the numbers. Keep in mind this is 40 YEARS from now. If you are 20 years old, you will be 60 years old. If you are 30 years old, you will be 70 years old. If you are 40 years old, you'll be dead. Sorry, but that's beyond life expectancy.

So at these ages, does this money and the freedom it buys sound appealing? Also, do you realize that this money will have 50% of today's buying power? Forty years ago you could buy a car for $3,000 and a loaf of bread for 20 cents. Lest we not forget the other lofty assumptions, gainful employment and a robust economy that behests a safe 8% per year. In 2008 the markets lost 50%. I guess the gurus forgot to mention these anomalies.

Folks, you don't want millions to accompany your cane, you want it to accompany your youth.

Every day, people sacrifice their time for tiny nuggets of wealth, where time is the liability and not the asset. Anything that steals time and doesn't have the power to free time is a liability.

Within the Slowlane, time is mistreated like an effervescent fountain that runs forever. Unfortunately, the mortality rate is 100% and life's prognosis is death. Some day you will die, and, hopefully, 60% of your time wasn't squandered in a cubicle while your children grew up and your spouse cheated with the yoga instructor.

### THE SLOWLANE IS A PLAN OF HOPE

The Slowlane dilutes your control. You're reading this book because you want to control your financial destiny, NOT put it in the hands of some company or the stock market. If you want to get rich, *you have to control and leverage the variables in your financial plan*—any financial plan without control immediately disintegrates into a plan of hope. Hope I don't get laid off! Hope my stocks rebound! Hope I get that promotion! Hope my hours aren't cut! Hope my company doesn't go bankrupt! Hope, hope, and hope! *Sorry, hope isn't a plan!*

The Slowlane plan rests in a mathematical prison, with time as the warden. To create explosive wealth fast, you must abandon the Slowlane formula and its lecherous relationship to time. *Wealth is built with time as an asset, not as a liability!*

Yet, the Slowlaner's reaction to Uncontrollable Limited Leverage is predictable: They embark on an errant fight against the one variable they perceive as controllable—their intrinsic value. The Slowlaner argues, "I must make more money!" And that fight is fought futilely with an expensive education.

### CHAPTER SUMMARY: FASTLANE DISTINCTIONS

- Slowlane wealth is improbable due to Uncontrollable Limited Leverage (ULL).
- The first variable in the Slowlane wealth equation evolves from a job that
