Contrast the foregoing with the appended showing of the common stock of Mullins Body (later Mullins Manufacturing) Corporation.

Between 1924 and 1926 we note the characteristic market swings of a low-priced "secondary" common-stock issue. At the beginning of 1927 the shares were undoubtedly attractive, speculatively, at about 10, for the price was low in relation to the earnings of the three years previously. A substantial, but by no means spectacular, rise in profits during 1927–1928 resulted in a typical stock-market exploitation. The price advanced from 10 in 1927 to 95 in 1928 and fell back again to 10 in 1929.

Year	Earned per share	Dividend	Price range
1924	$1.91	None	18–9
1925	2.47	None	22–13
1926	1.97	None	20–8
1927	5.13	None	79–10
1928	6.53	None	95–69
1929	2.67	None	82–10

A contrast of another kind is afforded by the behavior of the aircraft-manufacturing stocks in 1938–1939, as compared with that of war beneficiaries in 1915–1918. The two following examples will illustrate the relationship between market price in 1938 and 1939 and actual performance at the time.

	Boeing Airplane Co.	Glenn L. Martin Co.
Date	December 1938	November 1939
Market value of company	$25,270,000	$49,413,000
	(722,000 sh. @ 35)	(1,092,000 sh. @ 45 1/4)
Sales 1938	2,006,000	12,417,000
Net 1938	*555,000(d)*	2,349,000
Sales, 9 months 1939	6,566,000	8,506,000
Net, 9 months 1939	*2,606,000(d)*	1,514,000
Tangible assets, Sept. 30, 1939	4,527,000	15,200,000

In these cases the market was evidently capitalizing the as yet unrealized profits from war orders as if they supplied a *permanent* basis of
