company to be used in the business. Dividends, if declared, are paid to the share holders from this residue.

40. **Dividend Yield**

    A financial ratio that shows how much a company pays out in dividends each year relative to its share price. In the absence of any capital gains, the dividend yield is the return on investment for a stock.

41. **Liability**

    Anything tangible or intangible that is capable of being owned or controlled and has a negative economic value- add for the owner. An owner pays for the liability.

42. **DP or Depository Participant**

    An agent of the depository. They are the intermediaries between the depository and the investors.

43. **Securities**

    A negotiable financial instrument representing financial value. These could be debt securities (such as bank notes, bonds and debentures), equity securities (such as common stocks) and derivative contracts (such as forwards, futures, options and swaps).

44. **Credit Rating**

    It is an evaluation made by a credit rating agency of the debt issuer's likelihood of default. Credit ratings are determined by credit rating agencies.

45. **Credit Advisors or Credit Rating Agencies**

    A company that assigns credit ratings.

46. **Portfolio Manager**

    A person who makes investment decisions using money other people have placed under his or her control or a person who manages a financial institution's asset and liability (loan and deposit) portfolios.
