ones come in second.

I like to see lots of single busts. They perform well, and if they happen most often, then it makes trading a busted pattern more reliable with less stress.

Table 74.9 Busted Patterns

Description	Bull Market, Up Breakout	Bull Market, Down Breakout	Bear Market, Down Breakout
Busted patterns count	125 or 21%	558 or 63%	96 or 42%
Single bust count	67 or 54%	424 or 76%	58 or 60%
Double bust count	32 or 26%	14 or 3%	3 or 3%
Triple+ bust count	26 or 21%	120 or 22%	35 or 36%
Performance for all busted patterns	–14%	43%	22%
Single busted performance	–23%	56%	27%
Non-busted performance	–9%	38%	21%

Busted and non-busted performance. The last three rows in the table compare busted performance with non-busted wedges. Notice that single busted patterns outperform the other two rows, and by handsome amounts, too.

Consider trading a busted wedge after downward breakouts in bull markets. The rise averages 56%. Maybe you can bite off a bit of that for your wallet or purse.

Trading Tactics

Table 74.10 shows trading tactics.

Measure rule, targets. The measure rule for rising wedges is opposite that for falling wedges. The measure rule says that price should decline
