* To estimate the tax on the interest, multiply the amount of interest you received for the month by your tax bracket. If you don't know your tax bracket, multiply the interest by 0.25 to get a rough idea.

** If you've held this investment for more than a year, multiply the investment income by 0.15 to get a rough idea. If you've held it for less than a year, multiply the investment income by your tax bracket—if you don't know your tax bracket, multiply the income by 0.25.

WHEN A SPENDER MARRIES A SAVER

Anne and Marc moved in together in June and started to plan a March wedding. Anne's parents said they'd be willing to contribute
