Breakout day volume. Heavy breakout volume propels the stock higher after upward breakouts, but light breakout volume works best for downward breakouts. That's what the numbers tell me.

Table 73.7 is supposed to show how often price reaches a stop location, but the method used to calculate stops doesn't work with this chart pattern, so I removed it (the exterminator carried away the table, too, along with the bearish patterns).

Table 73.8 shows performance over three decades. The bear markets of the 2000s were not included in the statistics.

Table 73.6 Volume Statistics

Description	Bull Market, Up Breakout	Bear Market, Up Breakout	Bull Market, Down Breakout
Volume trend	72% down	70% down	75% down
Rising volume trend performance	42%	22%	–12%
Falling volume trend performance	37%	28%	–14%
Heavy breakout volume performance	40%	31%	–13%
Light breakout volume performance	36%	19%	–15%

Table 73.8 Performance and Failures Over Time for Bull Markets

Description	Up Breakout	Down Breakout
1990s	34%	–16%
2000s	47%	–11%
2010s	32%	–15%
Performance (above), Failures (below)		
1990s	22%	25%
2000s	25%	32%
2010s	33%	30%
