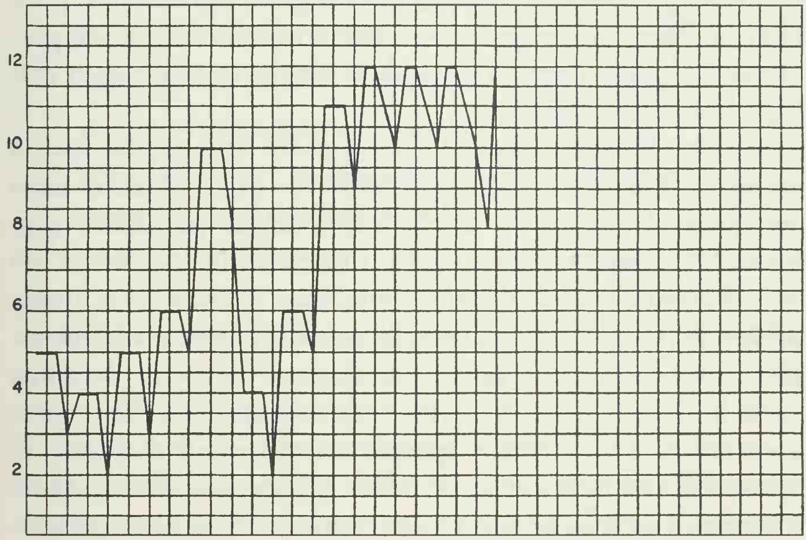
Translating these notes into numbers we have the following sequence: 5, 5, 5, 3, 4, 4, 4, 2, 5, 5, 5, 3, 6, 6, 6, 5, 10, 10, 10, 8, 4, 4, 4, 2, 6, 6, 6, 5, 11, 11, 11, 9, 12, 12, 11, 10, 12, 12, 11, 10, 12, 12, 11, 10, 8, 12.

These numbers are now plotted on a chart [following].



The clear pattern of *rising bottoms* and *rising tops* followed by the *upside breakout* to a *climactic* top is seen followed by a *longer* term *double bottom* which supports the second ascent to a new series of tops. The first seventeen numbers trace out the very bullish pattern of a *rounding bottom* and the upside breakout (at 6) is a key buy signal. This is a pattern which many stock prices follow and it is well to recognize it immediately so as to capitalize on the very bullish upside breakout from this type of rounding bottom.

The Stock Market Reflects a Mixture of Truths

Technical analysis of the stock market is largely based on many repetitive observations and the truths revealed often
