NOTE 19

An *Interim Report* of the Real Estate Securities Committee of the Investment Bankers Association of America (dated May 12, 1931 and printed in full in *Investment Banking*, June 1931, at pp. 7–10) estimated the total volume of real estate bonds outstanding at $10,000,000,000, divided into classes as follows:

Class 1.	Loans less than 75% of present revaluation in good standing, with good record	$2,000,000,000
Class 2.	Loans that have had no evidence of trouble but are over 75% of present value of security and appear to be able to work out without foreclosure or loss	2,000,000,000
Class 3.	Loans generally in excess of 75% of present value of security where foreclosure or workout with small loss is probable (*losses 10 to 25%*)	2,500,000,000
Class 4.	Items which when originally made were 80 to 100% loans. Such loans are now 125 to 150% items, *with losses from 25 to 60%* when foreclosure and sale are completed	3,000,000,000
Class 5.	In this group are the gross errors of judgment. Incompleted, ill-conceived and misplaced buildings, including many leasehold and second-mortgage bond issues. Losses in this class will run *from 60 to 100%* and items should often be entirely abandoned	500,000,000
Total		$10,000,000,000
