Note that these were surely not the lessons its authors intended, but they are what you can discern from the debacle surrounding the *most spectacularly wrong investing book ever*.

Every market gives us an opportunity to learn new lessons. You will find the tuition much less expensive if you can learn from *other people's mistakes*, rather than your own.

We obviously want to pay less attention to people who make forecasts that are terribly wrong, but what about people whose forecasts proved prescient? What about the guy who got the big one right?

Let's find out…
