To start with, it's an old manufacturing law that when production is doubled, production costs are automatically reduced by 20 percent. I hardly think any further comment is needed on this. Then, there is administrative overhead—

a cost item which can almost invariably stand a great deal of judicious pruning. It's very seldom necessary for an assistant vice-president's secretary to have her own secretary. I've run my business personally for decades—and I've never found any need for more than one secretary.

Truth to tell, much that is dictated and then typed in multiple copies could be passed on faster, more efficiently and more cheaply by the simple expedient of dialing a telephone. And I'll wager that most firms could slash their

"entertainment" budgets by 50 percent or more without losing a single sale. I can take a drink or two myself, but I've observed that one generally does far more business in

15 minutes over a cup of coffee than he can possibly do in three hours over a six-martini lunch.

There is no Federal statute that requires all salesmen and executives in a company to fly "deluxe" wherever they go, when they can get where they're going just as fast, almost as comfortably—and at an impressively lower cost —

on tourist flights. There are many other areas in which the smart young businessman will find that he can effect important economies. There is always room for improvement—and for savings—in business, be it in the home office, the plant or wherever.

I'm not advocating senseless penny-pinching. I am, however, saying that there is no excuse for waste or unnecessary expenditures if one is faced with heavy competition. In any all-out business battle to capture markets, it
