2018, but not all stocks covered the entire period, and as an added bonus, some stocks no longer trade.

Reversal (R), continuation (C) occurrence. As the table shows, most scallops act as continuations of the downward price trend, but it's close to random (for downward breakouts). Reversals occur at the top of upward trends and during declines, whether at the bottom of the downtrend or in the middle as the corrective phase of a measured move down.

Reversal/continuation performance. Reversals perform better after upward breakouts in bull markets, and continuations do better after downward breakouts.

Table 59.2 General Statistics

Description	Bull Market, Up Breakout	Bull Market, Down Breakout	Bear Market, Down Breakout
Number found	448	1,597	633
Reversal (R), continuation (C) occurrence	60% R, 40% C	45% R, 55% C	45% R, 55% C
Reversal, continuation performance	41% R, 37% C	–15% R, –16% C	–22% R, –24% C
Average rise or decline	39%	–16%	–23%
Standard & Poor's 500 change	13%	–2%	–10%
Days to ultimate high or low	261	58	36
How many change trend?	52%	31%	54%

Average rise or decline. The average rise in bull markets is below the average for all chart pattern types, but the two downward breakout columns show better than average results.
