

temperature in the room can drop to sixty-five degrees? Of course, but what will eventually happen? The thermostat will kick in and bring the temperature back to seventy-two.

Also, is it possible that because the window is open and it's hot outside, the temperature in the room can go up to seventy-seven degrees? Sure it could, but what will eventually happen? The thermostat will kick in and bring the temperature back to seventy-two.

The only way to permanently change the temperature in the room is to reset the thermostat. In the same way, the only way to change your level of financial success “permanently” is to reset your
