

in respect of inventories and somewhat higher as regards the fixed and miscellaneous assets than one might be inclined to adopt in other examples. We are allowing for the fact that motor-truck inventories are likely to be less salable than the average. On the other hand some of the assets listed as non-current, in particular the investment in White Motor Securities Corporation,

White Motor Company

Capitalization: 650,000 shares of common stock.

Price in December 1931: \$8 per share.

Total market value of the company: \$5,200,000.
