

Chapter 8: Data Analysis and Visualization

Seeing the Invisible: Finding Patterns in Financial Chaos

On June 9, 1974, a trader named Gary Ginter was staring at columns of soybean futures prices, trying to make sense of the market's movements. Unlike his colleagues who relied on instinct and rumors, Ginter was methodically plotting these numbers on graph paper, looking for patterns that others couldn't see. That day, his careful analysis revealed a subtle but significant pattern in the data—one that would help his trading firm,
