

```

3. apple.loc[apple['RSI14'] > 70, 'RSI_Signal'] = -1 # Overbought (potential sell)
4. apple.loc[apple['RSI14'] < 30, 'RSI_Signal'] = 1 # Oversold (potential buy)
5.
6. # Stochastic signals
7. apple['Stoch_Signal'] = 0 # Initialize with neutral signal
8. apple.loc[(apple['Stochastic_K'] > 80) & (apple['Stochastic_D'] > 80), 'Stoch_Signal'] = -1 #
Overbought
9. apple.loc[(apple['Stochastic_K'] < 20) & (apple['Stochastic_D'] < 20), 'Stoch_Signal'] = 1 #
Oversold
10.

```

Common overbought/oversold signals include:

- **RSI > 70:** Potentially overbought conditions
- **RSI < 30:** Potentially oversold conditions
- **Stochastic > 80:** Potentially overbought conditions
- **Stochastic < 20:** Potentially oversold conditions
-
