

- Trader's dilemma, 298–299
- Trading, algorithmic, 1
 - advantages, 3–4
 - algorithmic trading trends, 20
 - changing trading environment, 5–11
 - classifications of algorithms, 16
 - defined, 2
 - direct market access, 43–45
 - advantages, 44
 - disadvantages, 44–45
 - disadvantages, 4–5
 - execution options, 23–25
 - high frequency trading (HFT), 39–43
 - auto market making (AMM), 39–41
 - quantitative trading/statistical arbitrage, 41
 - rebate/liquidity trading, 41–43
 - intra-day analysis, 37
 - investment cycle, 15–16
 - macro-level strategies, 29–33
 - adaptation tactic, specifying, 32–33
 - implementation benchmark, selection of, 30
 - optimal execution strategy, selection of, 30–32
 - micro-level decisions, 33–37
 - limit order models, 34
 - smart order router (SOR), 35–37
 - post-trade analysis, 38
 - pre-trade analysis, 37
 - quantitative techniques, 38–39
 - recent growth in algorithmic trading, 11–15
 - rule based trading, 38
 - trading floor, 25–28
 - research function, 26–27
 - sales function, 27–28
 - types of algorithms, 17–20
 - types of orders, 23
 - venue classification, 21–23
 - dark pool, 21
 - dark pool controversies, 22–23
 - displayed market, 21
 - grey pools, 21–22
- Trading cost, 104–105, 141, 151, 162
 - equations, 235–237
 - model inputs, 236–237
- I-Star calculation, 241
- market impact
 - for basket of stock, 243
 - for single stock order, 241–243
- models, 241–243
- Trading environment, changing, 5–11
- Trading floor, 25–28
 - brokers, 60
 - cash trading, 25
 - electronic trading, 26
 - program trading, 25–26
 - research function, 26–27
 - sales function, 27–28
- Trading futures, 419
- Trading goal, specifying, 276–284
 - balance trade-off between cost and risk, 280–281
 - cost minimization, 277–278
 - with risk constraint, 279–280
 - price improvement, 279f, 281–283
 - risk minimization with cost constraint, 280
- Trading pattern uncertainty, 141
- Trading PnL, 105–106
- Trading price performance, 105–106
- Trading rate parameter, 310–312
 - market impact expression, 310
 - timing risk expression, 311–312
- Trading risk (TR) components, 240–241
 - parameter estimation error, 241
 - price volatility, 240
 - volume variance, 240
- Trading simulation performance measures, 448t, 450t
- Trading stability, 141
- Trading strategy, 237–239
 - comparison of POV rate to trade rate, 239
 - percentage of volume (POV), 237–238
 - trade schedule, 238–239
 - trading rate, 238
- Trading time, 239–240
- Trading venue classification, 21–23
 - dark pool, 21
 - controversies, 22–23
 - displayed market, 21
 - grey pools, 21–22
- Trading volumes, 61–63
 - large and small cap trading, 62
 - market share, 61–62
- Trading-related costs, 93
- Transaction cost analysis (TCA), 27–28, 87, 94–97, 361
 - alpha capture, 362
 - back-testing series, 362–363
 - best execution, 88
 - categorization, 94
 - classification, 92–93
 - investment-related costs, 93
 - opportunity cost, 93
 - trading-related costs, 93
 - comparing algorithms, 115–125
 - distribution analysis, 123–125
 - non-parametric tests, 116–123
 - components, 89–92
 - commission, 89
 - delay cost, 91
 - fees, 89
 - market impact, 91–92
 - opportunity cost, 92
 - price appreciation, 91
 - rebates, 90
 - spreads, 90
 - taxes, 89–90
 - timing risk, 92
 - cost curves, 361–362
 - experimental design, 125–127
 - balanced data sets, 127
 - data ties, 126
 - proper categorization, 127
 - proper statistical tests, 126
 - small sample size, 126
 - implementation, goal of, 89
 - implementation shortfall (IS), 97–105
 - complete execution, 99
 - expanded implementation shortfall, 101–105
 - implementation shortfall formulation, 104–105
 - opportunity cost, 100–101
 - trading cost/arrival cost, 104–105
 - intraday analysis, 95
 - investment capacity, 362
 - liquidation cost, 363
 - MI Factor Scores, 361
 - portfolio optimization techniques, 362
 - post-trade analysis, 96, 127–128
 - adaptation tactic, 114–115
 - benchmark price performance, 106
 - cost versus profit and loss, 97
 - index adjusted performance metric, 111–112
 - market cost adjusted z-score, 113–114
 - measuring/forecasting, 96–97
 - participation weighted price (PWP) benchmark, 108–109
 - performance evaluation, 105–115
 - pre-trade benchmark, 110–111
