

- relative performance measure (RPM), 109–110
- trading price performance, 105–106
- VWAP benchmark, 106–108
- z-score evaluation metric, 112–113
- pre-trade analysis, 95–96
- quantitative overlays, 361
- research, 27–28
- sensitivity analysis, 363
- transaction costs, 87–88
- Transaction cost analysts, 27
- Transaction cost equations, 300–302
 - market impact, 301
 - one-sided optimization problem, 302
 - price appreciation, 301
 - timing risk, 302
- Transaction costs, managing
 - in portfolio optimization, 333–334
- Transparent costs, 94
- Triangular arbitrage, 436–439
- Turnover, 177
- Types of algorithms, 17–20

U

- Unbundled transaction costs, 89–92, 95*t*
 - commission, 89
 - delay cost, 91
 - fees, 89
 - market impact, 91–92
 - opportunity cost, 92
 - price appreciation, 91
 - rebates, 90
 - spreads, 90
 - taxes, 89–90
 - timing risk, 92

- Unique covariance, 219
- Universe of stocks, 176

V

- Value-at-risk (VaR), 197
- Vector error-correction model (VECM), 435, 437*t*
- Vendor models, 364–365
- Verizon Communications, 444
- Visible cost. *See* Transparent costs
- VIX Index/SP500, 207
- Volatility, 70–73, 193, 196
 - annualized, 155, 178, 448*t*
 - historical, 193
 - implied, 193, 198, 207
