

Image 5.26 – ABCD Intraday Short Trade in Banknifty

The above image shows an example of the ABCD short trade in Banknifty.

The price displayed a gap down from the previous day range (A) with a significant volume spike and swiftly crashed to the downside (B). Later it showed a slight bounce (C) and then displayed a pin bar pattern.

We can opt for a short trade here and trail SL above each swing high. In the above case, our TSL was hit around 1:00 PM.
