

In addition, some essential features are also available for free users. One such helpful feature for day traders is 'Multiple Charts in One Window.'

Traders can access up to 4 charts in one window. It is highly beneficial when a trader has to monitor multiple charts for his trading setup.

If a trader is looking for a paid market profile software, he/she can buy it from BellTPO, as they are the leading market profile software providers.

Tool #2 Opstra Define Edge

After the implementation of strict margin rules (in futures segment in India) for day traders, many people started deploying different options trading strategies in their trading. However, many traders face difficulty in understanding the P&L and the probabilities of their options trading strategies. In Opstra Define Edge, traders can see all the parameters (along with margin details) related to their trading strategy.

Image 10.3 – Iron Condor Strategy in Apollo Tyres

For example, a trader looks at the above Apollo Tyres daily chart and predicts it will complete this month inside the channel only.
