Tradingview also provides many other valuable features such as - screening facility to shortlist the stocks based on both fundamental and technical criteria, backtesting (both manual and bar replay), strategy tester using pine editor, alerts facility, etc.

Tool #4 NSE Option Chain

Options trading is becoming popular currently, and day traders are showing the effort to learn the different strategies, after the strict rules on margin imposed by SEBI.

While studying these option strategies, many parameters such as open interest (OI), liquidity for different strike prices, Implied Volatility (IV), play a crucial role.
