

enable traders to perform backtesting with optimization features, which is the missing element in other software.

Image 10.8 – Amibroker Tool

Amibroker is not entirely free for traders. Anyone can backtest the trading strategies with local data, but we need to buy the license if we want to use some unique features of Amibroker. Besides, for live trading through Amibroker, we need to opt for live intraday data feeds from the exchange recognized vendors.
