

Image - A single conversation with a wise man is better than years of study! Our loud conversation started troubling his sleep. After some time, he woke up. The moment he opened his eyes, he saw me. I was a little curious about his response as we were meeting after 16-17 years.

In a low voice, he said – “*Indra, how did you pass engineering?*”

I couldn’t control my laughter, and all of us started laughing as if there were no end. I transited from Kannada medium to English medium in 8th standard, and I had a tough time passing the 10th standard.

At the moment, he was a class topper, and he sometimes helped to solve many problems. So, his doubt was valid. But I didn’t expect that he will ask such a question when I met him after 16-17 years, and that too in the middle of the night and woken up from sleep!

All of us had a lovely time at the marriage. To my surprise, my topper friend was also into the stock market, and we discussed many things about trading.

One thing he couldn’t understand about trading is why I give more importance to price. His point is that we can use indicators, and an indicator is enough to plan a trade.
