

Below are the five candlestick patterns which satisfied my criteria:

- 1) Hammer + Bullish Harami Combo
- 2) Pin Bar
- 3) Engulfing
- 4) Price Acceptance
- 5) Price Rejection

### **Hammer + Bullish Harami Combo**

It is a combination of two patterns – 'Hammer' and 'Bullish Harami.' I have seen this pattern almost every day in intraday trading. It occurs when the price takes support at crucial levels like IB (Initial Balance, from Market Profile methodologies) Low, PDL (Previous Day Low), Swing low, etc.

It is helpful when you are planning 'Long' trades.
