

EOD exit – 3.15 PM (IST – Indian Standard Time)

Result

Below is the result table when we run the back testing with three different EMAs (63, 82, and 100).

EM A	Initial Capital	Ending Capital	Accuracy	Profit Factor	Maximum Drawdown	Losing Trades (continuous)	Total Trades (10 yrs)
100	350,000	1,200,190	41.4%	1.33	14%	14	1223
82	350,000	1,434,289	41%	1.4	15%	10	1352
63	350,000	1,191,694	40%	1.25	12%	10	1573

System 2 – Two EMA Crossover

Instead of using price and MA crossover, we can also use 2 EMA crossovers to plan the trades. This system uses two EMAs to opt for the trades.
