

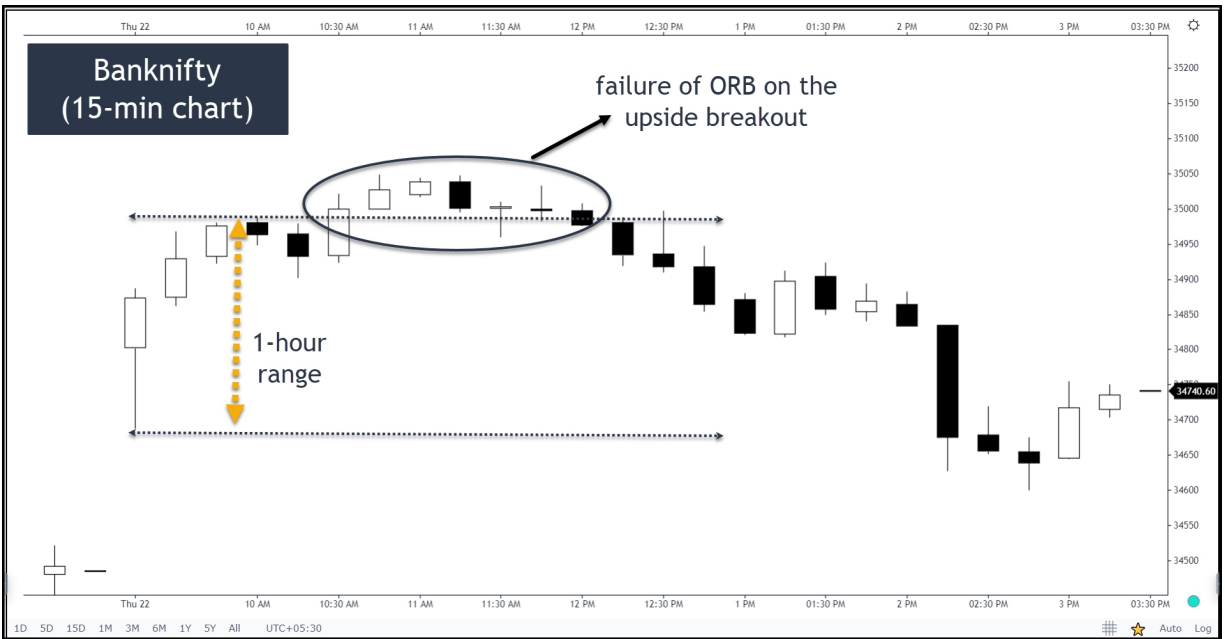

Image 5.13 – Failure of ORB on the upside breakout

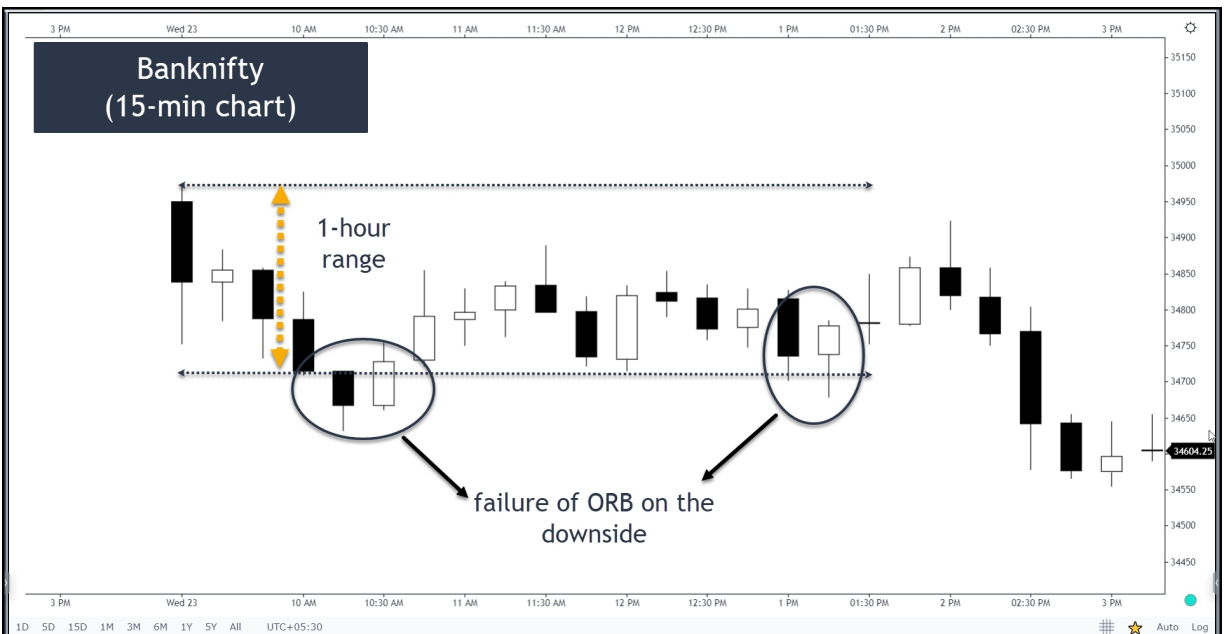

Image 5.14 – Failure of ORB on the downside breakdown

Looking at images 5.13 and 5.14, it is clear that ORB failed a few times, and the price displayed a counter move.

In image-5.13, the price traded above the 1-hour range for some time. If a trader had opted for a long trade, then the price would have hit his stop-loss. Similarly, in image 5.14, the price traded below the 1-hour range two times, and both times it bounced back.
