

There will, however, be quite a bit of talk about cars, and partying, and New York City.

First, though, I need to clear up something that could get me in trouble with your teachers . . . and there's a good chance it'll piss off your parents too.

The entire education system is designed around what I call the 'three steps to success':

Step 1: Study hard to get into a good university, so you can. . .

Step 2: Get a good paying job, so you'll . . .

Step 3: Be set for life!

And it's . . . bulldust.

(Actually, it works for parents and teachers, because it means you'll keep your head down and study, rather than making trouble for them.)

I'm here to tell you that the 'three steps to success' almost *never* work out the way they say.

My job involves helping a lot of broke and desperately unhappy 'three steps graduates' dig themselves out of a hole. These people studied hard, got good marks, got a decent job . . . and many of them are miserable financial trainwrecks.

Yes, almost everything you've been told about how to become wealthy is a lie.

And I'm here to tell you the truth, so here's my story.

I didn't come from a wealthy family.

I didn't get great marks at school (I was far from a straight-A student).

I wasn't in the cool crowd, or good at sport, or particularly talented at anything.

In fact, I spent my school years surrounded by people who were smarter and more confident than me.

Yet there was one little thing I learned about that *guaranteed* I would become a millionaire, that most of my mates didn't have a clue about . . .
