

and probably still don't know to this day.

The miracle of compound interest

The one thing I had in my favour was that I knew how compound interest works.

In fact, I didn't just know it—I lived it.

And you can too.

With enough time, you can't help but build enormous wealth. Your greatest investment weapon isn't a high IQ, a knack for numbers, or fancy letters after your name: it's *time*.

As a young person, that's something *you* have plenty of. And the sooner you start, the better.

Before I do the big reveal, though, I first need you to do me a favour:

Picture a kid at school who's been really mean to you.

Go on, do it.

You know, the person who thinks their selfies don't stink . . . who makes you feel like crap.

I'm going to show you how you're going to beat the pants off them, and have a much more successful life . . .

Got a picture of that bully?

Great.

How to beat the bully

You've probably noticed that your parents have been going a bit crazy lately with Money Meals and the Barefoot Ten. Well, let's say you've already checked off #7 of the Barefoot Ten, which was getting yourself a part-time job.
