

winning ‘fire dance’ music for the movie *Dances with Wolves*.

When I spoke to Peter, he mentioned a study that found that up to 40 per cent of kids from affluent homes experience troubling psychological symptoms and depression—around three times the average.

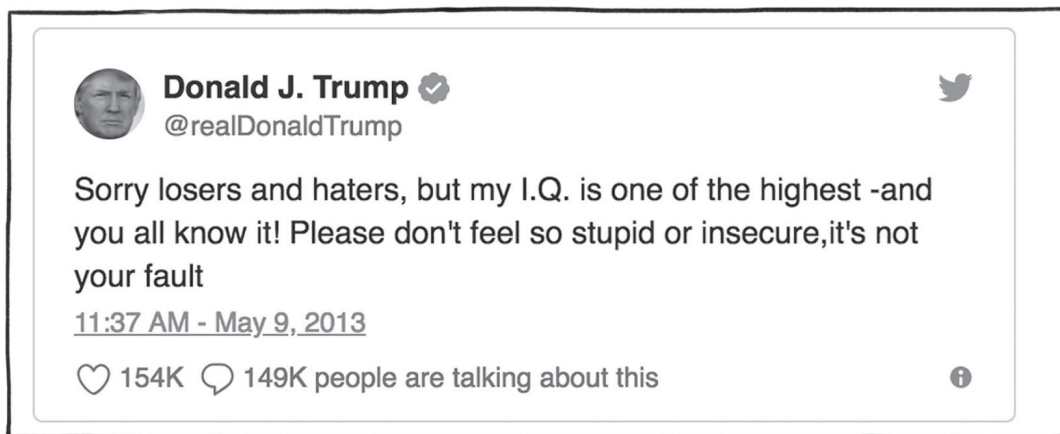

Yet, thanks to his dad’s wisdom, he sidestepped all that.

So you could argue that Buffett *did* share his wealth with his son. He taught his son about the power of having a strong work ethic, of building something you’re passionate about over a lifetime, and of letting that be its own reward.

## No trust fund kids

Look, there’s a reason Buffett is the world’s greatest investor—he’s a smart bloke. He knows that money can screw kids up big time . . . and it’s something I’ve personally seen happen over and over again in my career too.

And if you want any more confirmation, consider the following: Donald Trump got a trust fund and he grew into a man-child:

In summary then: handing your kids a blank cheque is *not* the best way to help them.

So, how *should* you help them?
