

Weekly Barefoot Money Meals

I based my book, *The Barefoot Investor: The Only Money Guide You'll Ever Need*, around the concept of 'Barefoot Date Nights'—where couples (and singles) go out to dinner and sort their money over garlic bread and wine.

I came up with the idea years ago when I was trying to get my wife, Liz, interested in how we'd manage our money as a couple. At the time, the idea of sitting down and chatting about money was as sexy to her as me breaking out a spreadsheet after dinner and saying, 'Let's you and I fill in some spending cells . . . baby.'

Anyway, I saw how powerful these nights were for us, so I wrote about them.

Turns out they were helpful to other people too. That book went on to become one of the bestselling Australian books of all time, and a big reason for its success was the practicality of the Barefoot Date Nights in getting 'non-interested parties' interested in money.

This book follows the same approach, but this time over the family dinner table.
