

Your Legacy

You've done some amazing things for your kids.

Really, you've created your legacy—the stories they'll tell at your funeral.

So you may be thinking this is really tough to top . . .

. . . and you'd be wrong.

See, everything you've done in this book has been about protecting your children from the tough times they'll face throughout their lives.

Well, now you're going to put something in place to protect them from the toughest time of all.

I've shared this with literally thousands of people and they all say it changed their life.

I call it the Fearless Folder, and it's the final way you'll say 'I love you'.

Introducing: The Fearless Folder

I face death—through the eyes of people who contact me—almost every week.

See, I'm the guy who parents write to when they get bad news . . . and it is absolutely heartbreaking.

They all say the same thing: that they never thought it would happen to them.

At moments like these I think about my own family, and how they'd go through it without me.

It's too painful to think about.
