

My husband just couldn't cope, so he left.

All of a sudden, I was a single mum caring for a baby and a sick child—and in debt over my head.

Our local community helped us fundraise to cover the medical expenses, which totalled over \$100k. But my personal debts were spinning completely out of control. And I was at risk of losing our home.

I borrowed *The Barefoot Investor* from the library and read it in one night. It changed everything. Within a day I had our family's first financial plan. And within 12 months, I had paid off my debts and had Mojo in the bank—I was in control!

I want the same for my kids. My daughter Talaya beat the odds—she is now 15 and tumour-free, but has an acquired brain injury that affects her vision and other areas of her life. Sometimes she gets worried and anxious about her future.

And that's why the Money Meals have been a godsend; it's a really simple way for me to teach her all the financial knowledge I wish I'd known when I was her age. With the Barefoot Ten, I now have a simple plan to teach her, so she'll always be able to feel in control.

In fact, as we've worked through them together, amazing things have started to happen . . .
