

It's a proud moment for you, too. What you're doing is changing your family tree: 'In our family we make smart decisions with our money.'

And that's gold!

A special note to future readers

Maybe you've picked this book up at the Romsey Op Shop in the year 2040.

Perhaps ING isn't around anymore. Maybe that guy on Twitter was right and the global currency is now Dogecoins.

(Maybe not.)

Yet, regardless of how the world looks, three things won't change when it comes to my advice on accounts:

No fees.

Easy access to your money.

And a market-leading rate of interest.

(Note for parents of younger kids: I'm pretty sure jam jars will still be around.)

In fact, because bankers change their rates all the time, and because kids are much savvier with a smartphone than I am, I humbly suggest that you get your teen to search the interwebs to see if there's a better account on offer before they sign up with ING. But make sure they read the fine print when they compare deals.
