

Johann Sebastian Bach
Arranged by Bryceson Treharne

Since there are eight notes in the scale (12 in the chromatic scale) the figure 1 will be assigned to the lowest note in the above theme. Putting the notes of the theme in terms of numbers and letting the first note start with the number 4, they read as follows: 4, 5, 6, 8, 7, 7, 9, 8, 8, 11, 10, 11, 8, 6, 4, 5, 6, 7, 8, 9, 8, 7, 6, 5, 6, 4, 3, 4, 5, 1, 3, 5, 7, 6, 5, 6, 4, 5, 6, 8, 7, 7, 9, 8, 8, 11, 10, 11, 8, 6, 4, 5, 6, 2, 8, 7, 6, 5, 4, 1, 4, 3, 4. Now these numbers are plotted on the chart, on page 246.

Checking the numbers against the chart, pretend that each number represents the fluctuating price of a stock and see how the chart follows all the technical chart principles just reviewed.

The first four figures are 4, 5, 6, and 8. This sets up a *gap* and predicts that the gap will be filled. The next two figures are a pair of 7's, thus filling in the gap. The next figure is a 9 and this represents an *upside breakout* above the previous high of 8. The gap from 7 to 9 on that jump is immediately filled in with a pair of 8's. The pair of 8's and the previous pair of 7's represent *rising bottoms* and this, together with the upside breakout to 9, constitutes a *bullish prediction of new highs to come*.

The new highs are then immediately scored with a *climactic* jump to 11. All figures between 4 and 11 have now been recorded with the exception of the number 10. Fulfilling the law of gaps, the figure 10 is then recorded and since
