

\$40—a 600-bagger long-term. It got as high as \$54 before the October stumble. The company has twice as much cash as debt and shows no sign of slowing down.

The officers and employees of 180,000 client firms could certainly have known about the success of Automatic Data Processing, and since many of Automatic Data's biggest and best customers are major brokerage houses, so could half of Wall Street.

So often we struggle to pick a winning stock, when all the while a winning stock has been struggling to pick us.

THE TENBAGGER IN ULCERS

Can't think of any such opportunity in your own life? What if you're retired, live ten miles from the nearest traffic light, grow your own food, and don't have a television set? Well, maybe one day you have to go to a doctor. The rural existence has given you ulcers, which is the perfect introduction to SmithKline Beckman.

A great patient's drug is one that cures an affliction once and for all, but a great investor's drug is one that the patient has to keep buying.

Hundreds of doctors, thousands of patients, and millions of friends and relatives of patients heard about the wonder drug Tagamet, which came on the market in 1976. So did the pharmacist who dispensed the pills and the delivery boy who spent half his workday delivering them. Tagamet was a boon for the afflicted, and a bonanza for investors.

A great patients' drug is one that cures an affliction once and for all, but a great investor's drug is one that the patient has to keep buying. Tagamet was one of the latter. It pro-
