

some rent or you have to carry out unexpected repairs to the property. The very worst case is probably needing to sell the house and starting from square one, but this is extremely unlikely, especially if you know what you .are doing

In order to work out what the future holds for the property market and the best time to invest, you need to look back at history. Although much of what I say applies to many countries, I am writing about the UK market, so .any international readers please bear this in mind

As far as we can recollect, after expansion comes recession, and after recession comes expansion. This is not my opinion, this is basic economic .history. History tends to repeat itself

From 2008 to 2014 we were in a pretty big recession. House prices fell or became stagnant and rents hardly moved in this period of time. In fact, rents have hardly moved from the year 2000. So what does this suggest? It suggests that probably sometime before 2025, house prices will rocket. .More excitingly, it suggests that rents will go up drastically too

A great time to invest is always after a big long recession, so I believe it's a .very good time to buy at this very moment

Some people are worried about interest rates rising and forcing mortgage payments to increase. You can currently fix your rates for up to 10 years;
