

putting up the advert I had six emails from six prospective housemates. I
couldn't believe it! I thought to myself

Wow! There are two areas in England that work for HMOs: Bournville and“
”!Wolverhampton

I rented both houses out within one month and the total rent was £2,900 per month! This was actually better than mine in Bournville! After finding out that both Bournville and Wolverhampton work for HMOs I decided to go on a mission. It was a mission to discover where else young professionals are looking to rent rooms. It didn't take long before I realised something
!quite incredible. People are looking to rent rooms . . . everywhere

Five-minute challenge

If I asked you to name a city right now ... I bet that there are tenants looking for a room in that city today. The only catch is it does have to be in the centre of a big town or city, but that still leaves a lot of places. If you named
!a small rural village with sheep around, then no, it wouldn't work

.Remember, centre sells; rural smells

On the Property Investors Crash Course, one of the exercises we do is to find live houses there and then. I go first to show how easy it is and then the
.students follow afterwards

I decided to do an experiment which was quite daring one day. I asked one of the students to pick a city and I said I would find a HMO property in that city that would generate high returns. I would have five minutes to find the
.house and do all my market research on the valuations and rents in the area

A student quickly volunteered, his name was Bill. Bill picked Telford, which isn't even a city, it's just a large town, but he chose it because he lives there himself. I didn't know this at the time. As it happens, Telford is not
