

money, because these strategies will enable you to leverage what you
.already have and achieve incredible things

They won't teach you

In 2008 when I lost my second property due to the mortgage company going bust and the lending rules changing, I was left without a strategy for buying properties with no money. Buying and remortgaging was no longer
.an option and I didn't have any money to put into my next deal

I was recommended to attend a course about Lease Option Agreements (LOA). I had no idea what LOAs even were but was told that it was a new
.way to buy properties without any money

I attended a three-day seminar and it was not what I was expecting at all. People were jumping on the tables shouting about how marvellous LOAs were and it was like a three-day party, but I didn't actually learn much about LOAs. By day two, I was getting a little frustrated, especially after paying good money to be there. On day three, I was then offered the 'advanced LOA training' where we would actually learn how to buy a house with no
.money

I signed up to this advanced seminar and they did teach how it worked, but I was left with huge gaps and still had no idea how to actually go about finding on of these deals. I had a basic understanding of how it worked but
.nobody from the training was confident enough to go and find one

Since then, through sheer perseverance and on-the-job training, I have managed to buy many properties using zero of my own money and have used LOAs very successfully. It is actually extremely simple and I have explained it to children who have understood. You will probably know more
