When you retire you have simple answers to these questions. Vicki and I, for example, prefer warm climates where we can live outdoors most of the year. We like to be near a shopping area with good public transportation, preferably in a city center. We like a small backyard, apartment patio, or balcony where we can put a table, chairs, and barbecue. Our living room should have a well-lit reading chair and comfortable places to sit. Our kitchen should be big enough for someone to cook or clean up. We require only one television, telephone, refrigerator, microwave, toaster, kitchen sink, and dining table.
