

how much metal we use in everyday life. The field encompasses everything from sheet metal to welding to boiler making. The salary of a metal-forming contractor and supervisor has gone up by 32 percent since 2012—and at \$65,874, it's not bad. Even normal metalworkers make a not-too-shabby \$55,000 a year. The future looks bright, with a projected 1.09 job openings per person in 2020. Metalwork is in high demand and is likely to remain that way for some time.

7. **Pipe-fitting contractor and supervisor.** *Top 50 rank: #23.* By now, you've probably surmised that a job with "contractor and supervisor" in the title is apt to pay pretty well. Pipe fitting is no different: a median salary of \$66,560, which has increased 32 percent since 2006. But even journeyman pipe fitters clean up nicely: in Alberta a laborer can make between \$40,000 and \$50,000. The trade is assembling and maintaining piping systems across a wide variety of venues, from chemical plants to oil pipelines to paper mills. The industry has experienced 46 percent growth in six years.
8. **Electrician.** *Top 50 rank: #31.* When it comes to job growth, electricians knock it out of the park. The industry experienced *100 percent growth* between 2006 and 2012. Median salary is \$68,493, no "supervisor" title required. I don't care who you are or where you live: there will always be a need for electricians. Is that a light bulb I see going on above your head?
9. **Mining supervisor.** *Top 50 rank: #43.* Mining supervisor is tied with oil and gas drilling supervisor for the number one spot when it comes to projected job openings, with an expected 2.3 jobs for every person in 2020. People have strong feelings about mining—it's dangerous and highly prone to market ups and downs—but no can argue that the
