

Operational Excellence and Lean Six Sigma

Consultants work with manufacturers to implement operational excellence methodologies, such as Lean Six Sigma, to drive process improvement, reduce waste, and enhance quality and customer satisfaction. Lean Six Sigma is based on data and statistical analysis. Hence basic understanding of Statistics is desirable

Sustainability and Circular Economy

Consulting services focus on helping manufacturers adopt sustainable practices, such as energy efficiency measures, waste reduction strategies, and circular economy models that emphasise resource recovery and reuse.

This is now the hottest thing in the market as the damage to people, planet, profit and purpose has been unprecedented.
