

Outcomes and Benefits

The successful implementation of OTM at SUN yielded significant outcomes and benefits, including:

Improved vehicle utilisation and optimised cost through better load planning.

Enhanced decision-making capabilities enabled by OTM’s analytics and reporting features.

Streamlined logistics planning processes, encompassing the right vehicle mix, enhanced truck turnaround time, and route optimisation.

Effective contract management, including share of business allocation, e-sourcing, and SLA adherence.

Increased visibility and control through a logistics control tower, supplier performance tracking, and monitoring real-time cost and operational metrics.

By leveraging OTM’s comprehensive capabilities and Deloitte’s consulting expertise, SUN achieved its objectives of optimising logistics costs, improving service levels, enhancing stock availability, and achieving OTIF targets, positioning the company for long-term success in the competitive pharmaceutical market.
