

World Class Frameworks

The consulting space offers many frameworks designed to tackle specific challenges or industries. Let's look at some of the most recognised and impactful frameworks that have proven effective with time.

SWOT ANALYSIS

This framework is a simple and widely adopted tool for examining an organisation's internal strengths and weaknesses as well as external opportunities and threats. Due to its simplicity and lack of proprietary ownership, it is a common starting point, making it accessible to everyone.

Strengths and Weaknesses

This refers to internal factors within an organisation, such as its resources, capabilities, processes, and culture.

Resources

Capabilities

Processes

Culture

For Example

A company's strong brand recognition or highly skilled workforce could be considered strengths, while outdated technology or high employee turnover might be weaknesses.

Opportunities and Threats

Opportunities are external factors that can help or hurt a business.

For Example

New market trends, regulatory changes, and technological advancements. Threats involve increased competition, economic downturns, or changes in customer preferences.

Consultants analyse these four elements to develop strategies. They aim to **capitalise on strengths, cut weaknesses, seize opportunities, and navigate threats.**
