

4 P’S / 7 P’S OF MARKETING

The 4 P’s and 7 P’s of Marketing are widely recognised frameworks used to develop comprehensive marketing strategies and analyse the effectiveness of existing marketing efforts. They offer a systematic way to review different parts of a company’s marketing mix and find ways to improve or seize new opportunities.

Marketing drives revenue growth, customer acquisition, and brand positioning. The 4 P’s and 7 P’s frameworks ensure that companies consider all relevant aspects of their marketing efforts, enabling a holistic and integrated approach to strategy development and execution.

These marketing frameworks are applicable in various scenarios

Developing marketing strategies for new product or service launches.	Evaluating the effectiveness of existing marketing campaigns or initiatives.	Identifying opportunities for market expansion or entry into new segments.
Analysing the root causes of sales slowdowns or market share declines.	Benchmarking a company’s marketing efforts against competitors.
