

Here is how it works:

Step 1

Product

Analyse the company's product or service offering:

- Features, quality, and differentiation from competitors
- Product lifecycle stage and potential for innovation or line extensions
- Alignment with customer needs and preferences

Step 2

Price

Analyse the pricing strategy and its impact on demand and profitability:

- Pricing model (e.g., value-based, cost-plus, competitive)
- Discounting policies and promotions
- Price elasticity and customer sensitivity

Step 3

Promotion

Assess the effectiveness of promotional activities and campaigns:

- Advertising and brand awareness initiatives
- Sales promotions and incentives
- Public relations and reputation management
- Digital marketing and social media presence

Step 4

Place (Distribution)

Examine the distribution channels and logistics:

- Physical distribution network (e.g., wholesalers, online platforms)
- Geographic coverage and market reach
- Supply chain efficiency and inventory management
