

Step 9

Develop recommendations

Formulate recommendations to enhance the company's marketing mix, addressing identified gaps or capitalising on opportunities. This may include product improvements, pricing adjustments, promotional campaigns, distribution channel optimisations, process enhancements, or organisational changes.

Step 10

Implement and monitor

Assist the client in implementing the recommended marketing strategies and establish mechanisms to measure their effectiveness, gather customer feedback, and make necessary adjustments.

The 4 P's and 7 P's of Marketing frameworks offer a thorough method for creating and assessing marketing plans. By examining each part of the marketing mix, consultants can find ways to improve things, hunt new opportunities, and make suggestions. This increases sales, attracts more customers, and strengthens the brand image.
