

Here is how it works:

- X

Step 1

Threat of New Entrants (Entry Barriers)

Analyse the ease or difficulty for new competitors to enter the industry:

Capital requirements and economies of scale

Access to distribution channels and supply chains

Brand loyalty and customer switching costs

Government regulations and licensing requirements

Proprietary technologies or intellectual property barriers

- X

Step 2

Bargaining Power of Suppliers

Evaluate the level of influence and control exerted by suppliers:

Supplier concentration and availability of substitute inputs

Switching costs for companies to change suppliers

The threat of forward integration by suppliers

Importance of the industry to the supplier's business

- X

Step 5

Intensity of Competitive Rivalry

Evaluate the level of competition within the industry:

Number and size distribution of competitors

Industry growth rate and capacity utilisation

Product differentiation and switching costs

Fixed costs and exit barriers
