Step 7

Identify strategic implications

Based on the analysis, identify opportunities to mitigate competitive threats, leverage strengths, and position the company for sustainable competitive advantage within the industry.

Step 8

Develop recommendations

Formulate specific recommendations for the company, such as:

Strategies to overcome entry barriers or deter new entrants

Initiatives to improve bargaining power against suppliers or buyers

Product differentiation or diversification to reduce substitution threats

Competitive positioning or consolidation to address intense rivalry

Step 9

Implement and monitor

Assist the client in implementing the recommended strategies and establish mechanisms to monitor changes in the competitive landscape, industry dynamics, and the effectiveness of the implemented ideas.

Porter’s Five Forces framework provides a comprehensive and structured approach to analysing an industry’s competitive dynamics and profitability potential.

By systematically evaluating these forces, consultants can develop robust strategies that position their clients for sustainable competitive advantage and long-term success.
